Summary

QA Automation Engineer with 2 years of experience in web and API testing using Selenium, REST Assured, Postman, and TestNG. Skilled in Java, SQL, and automation frameworks like Data-Driven and Hybrid. Proficient in CI/CD tools like Jenkins and GitHub Actions, with experience in Agile environments and defect tracking using JIRA. Focused on delivering quality through efficient test automation and reporting using Allure and TestNG Reports.

Technical Skills

Testing Tools: Selenium Webdriver/RC, Playwright, Cypress, Postman, TestNG, JMeter, REST Assured

Languages: Java, SQL, JavaScript

Defect Tracking: JIRA, Trello

Build & Reporting: ANT, Maven, Allure Reports, TestNG Reports

CI/CD Tools: Jenkins, GitHub Actions

Version Control: Git, GitHub

Experience

Auriss Technologies – India

Oct 2023 – Present

QA Automation Software Engineer

- Designed and developed a robust Hybrid automation framework using Selenium WebDriver, Java, TestNG, Maven, and Apache POI.
- Automated key regression test cases and integrated the test suite with Jenkins for scheduled CI/CD execution.
- Improved script execution efficiency by 40%, significantly reducing regression testing time and boosting overall test coverage.
- Utilized Allure Reports for detailed test result visualization and faster defect triage.
- Applied Page Object Model (POM) design for scalable and maintainable test scripts.
- Performed API testing and validation using Postman for key business-critical endpoints.
- Created clear and effective test cases to validate functional requirements.
- Managed test execution, defect tracking, and reporting in Agile sprints using JIRA.
- Collaborated with developers and product teams to ensure early defect detection and faster delivery cycles.
- Used Git and GitHub for version control and code collaboration across automation teams.

Education

Master of Computer Application (MCA), Uttaranchal University – Dehradun

85%, 2023

Bachelor of Science in Information Technology (B.Sc IT), Uttaranchal University – Dehradun

68.9%, 2021

Projects

OrangeHRM Automation Project

- Designed and executed manual and automated test cases for OrangeHRM modules including Login, Admin, PIM, and Leave Management.
- Built a scalable Hybrid Automation Framework using Selenium WebDriver, Java, TestNG, Maven, and Apache POI following Page Object Model (POM) principles.
- Integrated automated test execution with Jenkins for continuous integration and configured Allure Reports for real-time test reporting and analysis.
- Performed REST API testing using Postman and managed codebase via Git and GitHub for collaboration.

HRMS API Automation using REST Assured

- Designed and implemented REST API automation test scripts using REST Assured and Java for modules like employee management, login, and leave requests.
- Validated API responses and performed JSON schema checks for contract compliance.
- Created reusable request/response specifications and integrated test assertions with TestNG for structured test execution.
